* Explanation concerning the appropriate use of financial result forecasts and other special notes

(Forward looking statements)

The above forecasts are based on information available as of time of this announcement. Actual results may differ due to various factors. Please refer to page 4 of the attached materials for the forecasts.

(Regarding the share split)

Nichii Gakkan Company has executed a share split in which it has issued to the shareholders appearing on the list of shareholders and list of beneficial shareholders as of March 31, 2009 two shares for each share held. The impact of this share split has been taken into account for conditions regarding the dividend (tentative) for the year ending March 2010 and the per-share net income information included in the results forecast (consolidated and non-consolidated).

1. Business results

(1) Analysis of business results

1) Overview of business results

The Health Care Business experienced significant changes in its business environment during the year ended March 31, 2009. After the Long-Term Care Worker Compensation Improvement Law was passed in May 2008, numerous measures for improving long-term-care employee compensation and securing human resources were considered. A decision to increase compensation for these workers 3% was made in December, marking the first raise since the establishment of the long-term care insurance system, and local governments, acting in accordance with national government objectives, took steps to support professional training and help individuals obtain long-term care professional certifications. Given the downturn in export-oriented industries and negative impacts on related employment caused by the global economic crisis, long-term care, welfare, and other areas of the social support services sector are now viewed as growth generators that contribute to the expansion of internal demand.

For the year, Nichii Group reported record-setting net sales on the full-year contribution of the Health Care Business's facility care business, which was taken over in November 2007.

Results for the Medical Support Business suffered as the drive to revise contracts with medical institutions resulted in a temporary drop in clients for the related services, and the opening of new nursing care facilities in the Health Care Business necessitated the incurrence of upfront expenses. The Education Business, however, experienced a major increase in students for its Medical Office Work and Home Helper courses in the second half, and saw its profitability begin to improve.

As a result, net sales during the fiscal year were 213,601 million yen (199,797 million yen in the previous fiscal year), operating income was 1,013 million yen (2,171 million yen in the previous fiscal year), ordinary income was 800 million yen (2,042 million yen in the previous fiscal year), and net loss became 1,090 million yen (834 million yen of net loss in the previous fiscal year).

[Medical Support Business]

In the Medical Support Business, based on a medium- and long-term perspective, we worked to update contract terms with medical institutions outsourcing to the company, in order to stabilize the market for medical service provision going forward and with a view to maximizing the income level per medical institution.

In sum, despite a temporary decline in medical institution clients and its significant earnings impact, the operating margin has improved since the second quarter.

Regarding expansion of the medical management support services, sales of the Medical Receipt Diagnosis 2.0 management support product combining precise receipt examination and marketing services for clinics, and the MediClips homepage creation service for medical institutions, got underway, a medical management consulting division was established in November, and other steps were taken to build a comprehensive medical management support system.

As a result, the net sales of the Medical Support Business were 101,289 million yen (109,217 million yen in the previous fiscal year), and operating income was 8,784 million yen (10,700 million yen in the previous fiscal year).

[Health Care Business]

In home care services, the downward trend in service users that began with the 2006 revision in the long-term care insurance system continued through the first half, but a recovery marking year-on-year monthly increases began in July.

In facility care services, marketing activities seeking to make the most of the branch network resulted in a steady increase in service users, particularly at the 19 new locations opened in the first half, and pushed operating income before goodwill amortization into positive territory in the fourth quarter.

As for services not covered by long-term care insurance, nationwide development of Homemaker Services, which include the performance of cleaning and a full range of other housework services, began in October in a bid to expand into the field of daily life support services.

As a result, net sales of the Health Care Business were 99,702 million yen (79,631 million yen in the previous fiscal year), and operating loss was 758 million yen (190 million yen of operating income in the previous fiscal year).

Since Nichii Care Palace Co., Ltd., which became a 100% subsidiary of the company in September 2007, and the successor companies of the facility care services of COMSN, Inc. (namely, Nichii no Hohoemi Co., Ltd.; Nichii no Kirameki Co., Ltd.; and Nichii Home Co., Ltd., and Nichii Kanto Co., Ltd.) close their annual accounts in December, their financial results from January 1, 2008 to December 31, 2008 are included.

[Education Business]

In the Education Business, advertising focused on a high response rate and efficiency was continued and a career promotion campaign aimed at recruiting personnel to work in the company's nursing care facilities and simultaneously earn professional qualifications was pursued. Trial classes were also held at 100 classrooms throughout the country to promote medical and long-term care courses. These efforts and factors like the heightened demand for professional qualifications resulted in significant year-on-year enrollment gains for the mainstay Medical Office Work and Home Helper Level 2 courses through the second half. The Education Business achieved its first year-on-year net sales gain in five years and pulled quarterly operating income into the black in the fourth quarter.

New courses for new areas and to meet existing medical and long-term care needs were actively developed and offered. In a move to expand into daily-life-related areas, the Practical Dietary Education course was added in June and the Medical Office Clerical Workers course in November, the latter in response to the addition of doctors' office work aid in the April medical service fee system revision.

As a result, net sales of the Education Business were 11,906 million yen (10,157 million yen in the previous fiscal year), and operating loss was 677 million yen (1,793 million yen of loss in the previous fiscal year).

[Other Businesses]

Attention was focused on core businesses and improving the group's operational efficiency. Net sales were 702 million yen (790 million yen in the previous fiscal year), and operating income was 409 million yen (215 million yen in the previous fiscal year).

2) Outlook for the year ending March 2010

With medical and long-term-care expense control policies at a turning point, the environment for social support services in Japan is about to undergo changes. In its November 2008 meeting, the government's Social Security Committee recommended the reinforcement of both social security functions and funding. And the supplemental economic stimulus measures put forth in October 2008 and April 2009 focused on enhancing medical, long-term care, and child care services, and increasing the compensation of people who work in these fields. As these measures and others like them demonstrate, step-by-step initiatives aimed at strengthening social support for the Japanese people are being taken.

Responding to rapidly changing business conditions and diversifying customer needs, Nichii Group adopted a new executive management system (Daisuke Terada, President and Representative Director) on April 1, 2009 to help ensure the company is capable of generating sustained growth.

Efforts to further strengthen the business based under the new executive management system are to begin during the year ending March 2010.

Segment outlooks are given below.

[Medical Support Business]

The Medical Support Business will continue to offer products and services that help to address and resolve a broad range of issues faced by medical institutions, and carry on with efforts to revise contracts with existing medical institution clients.

At the same time, it will strive to improve customer satisfaction by improving service quality. This will be done by expanding the career-enhancement and staff training systems to help ensure that high-quality services are delivered by high-quality staff.

To strengthen medical management support services, a Consulting Business Department (the present New Company Establishment Planning Office) was established in October 2007, and this unit will make the most of expertise developed in medical office administrative services and PFI businesses to offer medical institutions comprehensive support in everything from management consulting to personnel training, studies, and research.

Measures to strengthen units managing the child care businesses will be advanced in an effort to expand this business and strengthen daily life support services.

[Health Care Business]

Conditions for the Health Care Business are expected to see ongoing efforts to revamp the long-term care insurance system to make it sustainable. These will likely include the implementation of measures aimed at improving compensation for long-term care workers, the supplementary economic stimulus measures passed by the government in April, and other initiatives for bringing about better compensation for care workers and more favorable business conditions for long-term

care service providers.

Nichii Gakkan, for its part, will increase staff compensation and training to strengthen its workforce, and push ahead with efforts to promote appropriate facility operations and enhance compliance.

In mounting a more detailed response to consumer needs, the total long-term care service system ranging from minimizing care needs to home care and facility care will be further strengthened, with the ultimate goal of providing ongoing services tailored to the life stages of individual clients.

Efforts to gain facility care customers will continue for the long-term care business taken over in November 2007. Furthermore, in pursuit of operational efficiency and synergies among the various services offered, non-consolidated subsidiaries – Nichii Care Nagano Co., Ltd., Nichii Care Gifu Co., Ltd., Nichii Care Kyoto Co., Ltd., Nichii Care Aichi Co., Ltd., and Nichii Care Hyogo Co., Ltd. – providing home care services in five prefectures will be absorbed by Nichii Gakkan Company in October 2009. Similarly, in the May 19, 2009 Board of Directors meeting, it was decided that Nichii no Kirameki Co., Ltd., a consolidated subsidiary operating economically priced nursing homes; Nichii no Hohoemi Co., Ltd., a group home operator; and Nichii Kanto, Co., Ltd, which provides day care services in the Tokyo metropolitan area, would also be absorbed into Nichii Gakkan Company.

Nichii Home Co., Ltd., an operator of medium-priced nursing homes, and Nichii Living Co., Ltd., a provider of rental housing specialized for the elderly, will be absorbed by Nichii Care Palace Co., Ltd., which operates medium-priced nursing homes, for further business development and operational efficiency.

The mergers of Nichii Gakkan Company with eight of its subsidiaries will be submitted for approval in the 37th ordinary general meeting of shareholders scheduled for June 26, 2009.

The financial impacts of these mergers are included in the results forecast for the year ending March 2010.

[Education Business]

Given the heightened interest in professional qualification courses in the medical and long-term care fields, the Education Business is expected to turn in a solid performance. To achieve growth over the long-term, it will move forward with the development of daily-life support and health-related courses and strengthen development efforts for the Medical Office Clerical Workers course and Care Worker Basic Training courses, which are seeing growing demand in the medical and long-term care fields.

In response to growing student needs for alternative ways to take courses, attention will be focused on increasing convenience for students and on efficient business development.

[Other Businesses]

Nichii Group is pursuing business development that makes the most of the group's management resources and implementing optimal group strategies. Nichii Green Farm Co., Ltd. is preparing facilities and organizational systems in pursuit of agricultural operations linked to the Health Care Business.

In consideration of these environments and prospects, our outlook for the performance in the year ending March 31, 2010 is 236,000 million yen for net sales (213,601 million yen for the current fiscal year), 5,470 million yen for operating income (1,013 million yen for the current fiscal year), 5,350 million yen for ordinary income (800 million yen for the current fiscal year), and 2,500 million yen in net income (net loss of 1,090 million yen for the current fiscal year).

(2) Analysis of financial position

1) Overview of financial position

During the fiscal year, cash and cash equivalents ("cash") increased by 1,001 million yen year on year to 4,436 million yen. Cash flows from each activity and their factors are shown below.

[Cash flows from operating activities]

As a result of operating activities during the fiscal year, cash increased by 2,337 million yen.

This was primarily the result of non-cash expenses, in the form of depreciation and goodwill amortization, and progress in recovering accounts and other operating receivables.

[Cash flows from investing activities]

As a result of investing activities during the fiscal year, cash decreased by 4,139 million year

This was mainly due to purchase of intangible fixed assets such as software, and payments of loans receivable to related companies.

[Cash flows from financing activities]

As a result of financing activities during the fiscal year, cash increased by 2,772 million yen.

The primary factors producing this result included an increase in proceeds from short-term borrowings, and outlays for corporate bond redemptions and dividend payments.

Trends in cash flow indicators for the group can be seen below.

	Year ended March 31, 2008	Year ended March 31, 2009
Equity ratio (%)	41.6	39.6
Equity ratio based on present value (%)	41.7	45.6
Debt redemption (years)	_	16.9
Interest coverage ratio (times)	-	4.0

Notes: Equity ratio: Shareholders' equity/total assets

Equity ratio based on present value: Total present value of stock/total assets

Debt redemption: Interest-bearing liabilities/operating cash flow

Interest coverage ratio: Operating cash flow/interest payments

- 1. Each indicator was calculated from consolidated financial results.
- 2. Total present value of stock is the product of closing stock price at the end of period and the total number of outstanding shares at the end of period (after deducting treasury stock).
- 3. Operating cash flow is equal to the cash flows from operating activities in the consolidated statements of cash flow. Interest-bearing liabilities are all the liabilities on which interest is paid, out of the liabilities in the consolidated balance sheet. Interest payments are the interest payments as shown in the consolidated statements of cash flow.

(3) Basic principles of profit distribution and dividends for the current and next fiscal year

Our basic policy is to provide our shareholders with stable and continuous profit distributions. Considering business performance trends from a mid- to long-term standpoint, we formulated a consolidated dividend policy.

For the year under review, we are planning to pay a year-end dividend of 11 year per share. For the year ending March 2010, we are looking forward to paying an annual dividend of 6 year per share, which reflects the April 1, 2009 2-for-1 share split and an increase in profit distribution in consideration of business performance.

(Yen

	Cash Dividends per Share					
(Record date)	2Q-end	Year-end	Annual			
Year ended March 31, 2009	11.00 (Actual)	11.00 (Forecast)	22.00 (Forecast)			
Year ending March 31, 2010	6.00 (Forecast)	6.00 (Forecast)	12.00 (Forecast) Given the share split, the annual per-share dividend will come to 24 yen.			

(4) Business and other risks

Presented below are the potential risks to the operations of each business of Nichii Group. We work on to mitigate such risks by dispersing and acknowledging them. However, in the event of an unforeseeable incident, such risks may cause serious effect on our business performance and financial conditions of the group.

External factors and risk factors with low possibilities are also disclosed here from the standpoint of positive information disclosure on the matters deemed important for those making investment decisions.

The following matters were determined to be potential risks by the group upon preparing this data as of the last day of the fiscal year, and may not cover all the risks when making an investment decision on our stocks.

1) Business risks

[Medical Support Business]

Nichii Group's Medical Support Business provides, among other services, medical practice services other than medical practice itself, medical-related duties, and medical service management consultation services.

Medical institutions will see major fluctuations in their medical revenues due to the biennial revision of the medical service fee system and the medical insurance system reform (Article 2, Paragraph 2 of the Health Insurance Law Revision Law).

The group provides services to medical institutions, so the contents of revision rate for medical service fees and medical insurance system reform may affect our contract fees and the contents.

[Health Care Business]

The group's Health Care Business is mainly attributed to services that are covered by Long-Term Care Insurance Law. Therefore, reviewing the long-term care insurance system and payment can have a major effect on the net sales and profits of the business. These services are regulated by the Long-term Care Insurance Law (Law No. 123, December 7, 1997) and various other laws and ordinances.

The entire system is subject to review every five years (Article 2 of Supplementary Provisions of the Long-term Care Insurance Law) and long-term care payment is subject to review every three years, so the decisions hereafter may have an impact on the profitability of our Health Care Business. In the future also, revision of long-term care payment or review of the system may affect the revenue of the business.

In addition, we are promoting the community-based business by lease contract in our long-term care facilities such as group homes, pay nursing homes, and day care facilities. Since the contract term is 20 years in general, lowering in availability of facility due to the decrease of residents or the fall of average residential charge may affect the revenue of the business.

[Education Business]

The Home Helper Training Course, our major educational program, is subject to the "ordinance concerning home-visit care providers" (Health, Labour and Welfare Ministry Ordinance No. 23), and is required to obtain certification from the prefectural government.

Changes in the qualification requirements (training hours, enhanced curriculum, etc.) for care workers taking the Home

Helper Level 1 Course are scheduled to take effect April 1, 2012. The future revision of various systems in terms of such qualifications may affect net sales and revenue of this course.

2) Risks due to the internal management system

The Nichii Group is working to strengthen the self-directed operational management framework as well as internal check functions, to prevent human errors and dishonesty of employees. However, future operational management problems could cause a loss of trust by stakeholders, and could affect our business performance.

[Risks due to personal information]

Each business segment of the group handles personal information specified in the Act on Protection of Personal Information.

We recognize the protection of personal information as an extremely important business issue. Therefore, we have established the Information Protection Committee to ensure appropriate acquisition and handling of information, and are working to prevent leakage of personal information and reoccurrence of such problems through setting up privacy policies and providing in-house training.

However, a personal information leak could cause loss of confidence in society, claims for damage, etc. to affect our business performance.

3) Official license and legal regulation in personnel business

For the personnel business carried out for Medical Support Business and Health Care Business, we already acquired the permission of general workers dispatching business based on the "Act for Securing the Proper Operation of Worker Dispatching Undertakings and Improved Working Conditions for Dispatched Workers (Labor Dispatch Law)."

As for "Labor Dispatch Law," if a personnel service company is found to be disqualified or conducted illegal behaviors, it may be deprived of the permission of personnel business or ordered to suspend the business.

Nichii Group continues to thoroughly implement the compliance. However, violating the law, if it should occur in our group, may affect our group performance.

4) Risks due to natural disasters and accidents

Large-scale natural disasters such as earthquakes, tsunami or the spread of new influenza strains, etc. might impede staff and facilities from operating properly. If this causes unavailability of our services to users, it could reduce sales and incur extraordinary expenses.

5) Risks related to the application of impairment accounting

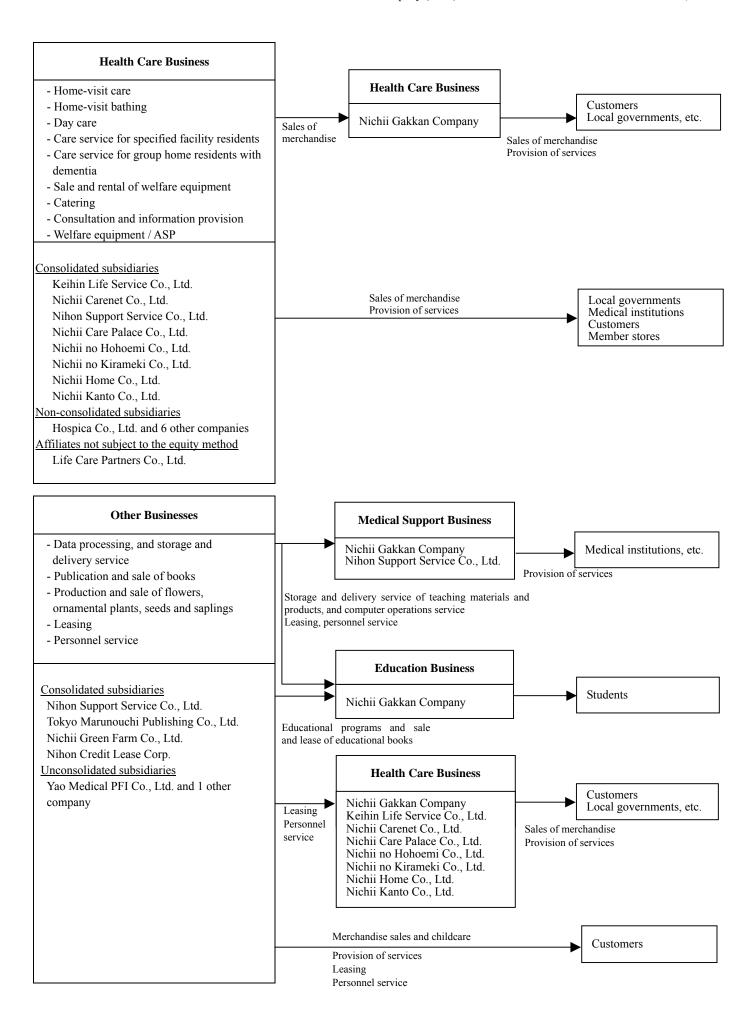

The Health Care Business uses land and buildings to provide a portion of its service offerings and has recorded goodwill in connection with its takeover of facility care business in November 2007. If there are material profitability decreases in the future, it will be necessary to record impairment losses that could impact Health Care Business earnings.

2. Overview of Nichii Group

Nichii Group consists of Nichii Gakkan Company, its 20 subsidiaries, and its one affiliate. Nichii Group is engaged in four businesses (Medical Support Business, Health Care Business, Education Business, and Other Businesses). In the Medical Support Business, the group primarily provides medical practice services to medical institutions and pharmacies; sales, disinfection, and sterilization services for medical equipment; and medical affairs consulting. In the Health Care Business, the group provides home care services mainly under long-term care insurance system (home-visit care, home-visit bathing, and day care), care service for specified facility residents, care service for group home residents with dementia, sale and rental of welfare equipment, catering, and other services. In the Education Business, the group provides educational programs primarily for medical office workers and home helpers. In Other Businesses, Nichii Gakkan Company's subsidiaries take the lead in providing data processing, storage and delivery service, book publication and sale, production and sale of flowers, ornamental plants, seeds and saplings, leasing, and personnel services.

Nichii Group's businesses and positioning of each business are shown below. The business categories correspond to those in the segment information by business category.

Business Category	Principal Businesses/Products	Principal Companies
Medical Support Business	Medical practice services such as reception, medical fee claims, accounting, computer operations, and medical record management, sale, disinfection and sterilization services (inside the hospital) for medical equipment, medical affairs consulting, etc.	Nichii Gakkan Company Nihon Support Service Co., Ltd.

Nichii Carenet Co., Ltd. Nihon Support Service Co., Ltd. Nichii Care Palace Co., Ltd. Nichii no Hohoemi Co., Ltd. Nichii no Kirameki Co., Ltd. Nichii Home Co., Ltd.
Education Business	Courses for medical office work, home helper training, babysitter training, and sign language, etc.	Nichii Gakkan Company
Other Businesses	Data processing, storage and delivery service, publication and sale of books, production and sale of flowers, ornamental plants, seeds and saplings, leasing, personnel service, etc.	Nihon Support Service Co., Ltd. Tokyo Marunouchi Publishing Co., Ltd. Nichii Green Farm Co., Ltd. (Former Roris Co., Ltd.) Nihon Credit Lease Corp.

3. Management principles

(1) Basic principles of management

Based upon the management philosophy of "aiming to help bring about the realization of a prosperous society and comfortable living in business areas related to healthy lives, Nichii Group, through creative and constructive business activities, contributes to the good health and happiness of individuals in meaningful ways," Nichii Group aims to be recognized as a trusted and appealing corporate group by contributing to improve the quality of life and society in the three fields; Education, Medical Support, and Health Care.

We also recognize that we must fulfill our social responsibilities as a corporate group, comply with corporate ethics, and increase the corporate brand value in our activities while deepening our trusting relationship with our shareholders and other stakeholders. In order to achieve this goal, we wish to share the idea of self-improvement to each organizational structure and employee as well as aggressively maximizing our corporate value based on the slogan, "Strength through kindness."

(2) Management goals

Nichii Group set the three long-term goals while taking the following points into consideration: a) The group is providing personnel service. b) Medical support and welfare businesses are expected to expand in the future. c) The group focuses on shareholder value.

1) Net sales growth → double-digit growth

2) Operating income to net sales → 7% or higher
 3) ROE (return on equity) → 15% or higher

(3) Mid- to long-term strategies and issues to be addressed

Nichii Group, based on the management philosophy above, aims to achieve sustainable growth and contribute to the building and development of social infrastructure in the fields of education, medicine, and long-term care. In addition, under the new management system implemented in 2009, we are incorporating the views of employees as consumers in promoting the development and offering of high-value-added services that meet market needs. At the same time, we are moving to strengthen the service expertise and networks developed through existing businesses and pursuing synergies through organic connections within the group as we strive to provide a wide range of services covering the daily life support and other fields, and meet corporate social responsibilities.

[Medical Support Business]

The environment surrounding the Medical Support Business, which includes factors like the medical care system reform begun in 2008 and medical service fee revisions implemented in April 2008, is seeing the introduction and implementation of new policies, as well as changing needs in the medical services environment and customer needs.

As such, the Medical Support Business restructured its business systems in April 2009 to strengthen its earnings base and move forward with the provision of products and services addressing market needs.

We will work to secure, and offer the stable provision of, outstanding human resources for the ongoing delivery of high-quality services, and develop and provide services that help to improve the efficiency of medical institutions, marketing strategy support, and other high-value-added Medical Management Support Services.

We will also actively develop and offer timely products and services. These are exemplified by: 1) Comprehensive regional care services based on the seamless connection of medical and long-term care applying the operational base we have built for our home care and facility care services, and 2) Expansion of child care businesses aimed at enhancing child care support services.

[Health Care Business]

The operating environment for the Health Care Business is experiencing legal changes undertaken to address Japan's rapidly aging society. Long-term care payment, for example, was revised in April 2009, and changes in long-term care insurance are scheduled for 2011. In 2025, the ratio of "Only aged household" occupied among the all households is expected to be 70%. To be prepared for the coming unprecedented aging society, the improvement of total social infrastructure for medical, long-term care, and residential facilities is called for urgent attention.

Nichii Group strives to improve the quality of its broad range of existing services covering everything from minimizing care needs to home care and facility care. However, we are also devoting significant attention to welfare services for the disabled, homemaker services, and other services not covered by long-term care insurance in an effort to provide long term,

comprehensive services that meet diversifying customer needs.

We are working to expand our service system to cover the entire country by expanding the number of facility care locations, and improving career-enhancement and staff training systems to help secure and educate care workers. Our objective in this regard is to strengthen staff support systems within individual service offices and branches specialized for particular business segments.

[Education Business]

Against the need to strengthen medical, long-term care, and other social welfare functions, the services offered by the Education Business, which nurtures the development of human resources for these fields, are gaining in importance.

To solidify systems that provide human resources to our Medical Support Business and Health Care Business, we will further improve our course quality by using information gained through our medical and long-term care services as feedback for course curricula. Furthermore, we will build systems that generate stable earnings by developing classrooms and classes that balance student convenience and company earnings, and place effective ads in media with high response rates. To expand our student target, we will actively develop and offer health-related courses, for which there is great societal demand, and other new courses outside our main offerings in a broad business development push.

[Other Businesses]

For Other Businesses, we will apply management resources normally used to deliver medical and welfare-related services to start up agricultural operations and take other steps to strengthen operations that are useful to the fields of medical and welfare services.

In the future also, we will continue to implement our group strategies with the ideal form of organization in order to increase the value of the Nichii Group and develop efficiency of our business.

(4) Other significant matters for management

There are no applicable matters.
