1. Qualitative information on quarterly financial results

(1) Qualitative information on consolidated business results

The social security service in which the Nichii Gakkan Group operates is undergoing moves toward a comprehensive reform of social security and tax, with the dual aims of rebuilding a sustainable social security system and strengthening the country's fiscal health. With the revisions to the long-term care insurance system and to compensation for medical service fees and for long-term care workers both carried out in April 2012, and legislation for a comprehensive reform of social security and tax, which includes a phased increase in the consumption tax rate, passed by the House of Representatives in June 2012, the relevant legal framework is taking shape.

The government's "The Strategy for Rebirth of Japan" proposes a growth strategy to address globalization and the country's declining birthrate and aging population, by deregulating the medical, long-term care, and health fields to create new markets and expand employment across generations.

Against this backdrop, the Nichii Group launched a medium-term management strategy in April 2012 to address these drastic environmental changes and achieve stable, long-term profit growth. Under this strategy, we have been promoting the expansion of our business areas and reinforcement of our business base, to increase growth, stability, and profitability at all of our businesses.

During the first three months ended June 30, 2012, we strove to expand our business scope by making initial preparations for support services for international medical exchanges at the Medical Support Business, expanding services not covered by the long-term care insurance system at the Health Care Business, and strengthening the development of our language education at the Education Business. In particular, we view language education as essential to the Nichii Group's strategy. In addition to achieving stable growth for the Education Business, we used language education to address the internationalization of medical institutions, and develop English conversation lessons for children at the child care business. Accordingly, we launched the new COCO Juku brand in April 2012 and aggressively opened schools across Japan, and carried out promotional activities through television commercials and advertising on public transportation, to establish a nationwide base for our language school business.

To reinforce our operating base, in addition to the strengthening of existing businesses by aggressively opening long-term care facilities, realigning our marketing structure and restructuring our Health Care Business, and beginning Group realignment for personnel services, as we have worked to build an optimal organization for the execution of our strategy.

In terms of business results, the Medical Support Business and Health Care Business each recorded year-on-year sales and profit growth on increases in the number of users of their services and from further improvements in operational efficiency. At the Education Business, although GABA Corporation continued to show solid results, a decline in enrollment at existing courses and strategic investment for COCO Juku led to sales growth, but with a decline in profit.

As a result, consolidated net sales during the first three months ended June 30, 2012 totaled 65,644 million yen (compared with 61,132 million yen in the same period of the previous year), with operating income of 1,863 million yen (2,225 million yen), ordinary income of 1,673 million yen (2,277 million yen), and net income of 613 million yen (1,038 million yen).

Results by business segment are as follows:

<Medical Support Business>

The Medical Support Business is in the final year of its contract revision strategy launched as a five-year plan, and continuously expanded its scope of operations at one medical institution, while at the same time worked to acquire new contracts, primarily at private hospitals. In terms of strengthening the human resource base under the contract revision strategy, continued efforts were made to improve staff compensation, increase staff retention and skill levels, enhance operational efficiency, and deliver higher customer satisfaction, and the continuation of this favorable cycle resulted in a continued trend of profit growth.

Efforts to expand management support services included supporting closer cooperation between medical care and long-term care services, and making initial preparations for support service for international medical exchanges, as we strove to expand our fields of operations by pursuing synergies across the Group and between businesses to provide comprehensive support to institution management.

As a result, the segment sales during the first three months ended June 30, 2012 totaled 25,870 million yen (compared with 25,694 million yen in the same period of the previous fiscal year), with operating income of 2,086 million yen (1,962 million yen).

<Health Care Business>

The Health Care Business further expanded its network of long-term care facilities and worked to increase the utilization of existing facilities, which led to increases in the number of users for both home-care and facility-care services. Services not covered by long-term care insurance also maintained a stable growth track on continued strength in the number of users of welfare services for persons with disabilities.

The effect of the revisions to long-term care compensation carried out in April 2012 was held to a minimum by promoting efficient facility management, and through even closer cooperation between medical care and long-term care operations, we strengthened our development of home-visit care services, as we strove to enhance our total long-term care services in line with user needs.

Our business development in China included the conclusion of a basic agreement for a capital tie-up between Riyi Fuli Qiju Maoyi (Shanghai) Co., Ltd., which was set up in April 2012 as a subsidiary of Nichii Carenet Company, our group wholesaler of long-term care products and welfare equipment, and Toyota Tsusho Corporation. We intend to further strengthen our operating base by offering higher value-added welfare equipment wholesaling services in China.

During the first three months ended June 30, 2012, the home-care services facilities opened nine new care plan facilities (bringing the total to 746), 13 new home-visit care facilities (1,075; including home-visit bathing facilities), five new day-care facilities (331), and 16 new home-nursing facilities (39). In the area of facility-care services, we opened one new Nichii no Hohoemi facilities (bringing the total to 242) and four new Nichii no Kirameki facilities (47).

As a result, segment sales for the first three months ended June 30, 2012 totaled 34,599 million yen (32,329 million yen in the same period of the previous fiscal year), with operating income of 2,638 million yen (2,090 million yen).

<Education Business>

In the Education Business, as the employment environment showed a gradual improvement, demand for accreditation continued to decline, and as a result enrollment at the Education Business's mainstay Home Helper Level 2 Course and Medical Administration Course decreased.

With the language education business expected to grow going forward, we are aggressively rolling out the new COCO Juku brand to meet diverse language education needs and maximize the Group's strengths. We are striving to provide a unique, proprietary curriculum that includes group lessons for businesspeople, primarily using a two-instructor system, and English lessons tailored for medical staff.

During the first three months ended June 30, 2012, we opened 29 language schools across Japan and began full-scale promotional activities from June to raise awareness of COCO Juku, including television commercials, advertising on public transportation, and trial lessons, and also carried out strategic investment to attract students.

Solid results continued at GABA on increased enrollments.

As a result, segment sales for the first three months ended June 30, 2012 totaled 5,083 million yen (3,026 million yen in the same period of the previous fiscal year), with an 827 million yen operating loss (a 309 million yen profit in the same period of the previous year).

<Other Businesses>

In Other Businesses, centering on Lakewoods Garden Himeharu no Sato, in Mobara City, Chiba Prefecture, we strove to increase awareness and promote our therapeutic dogs.

As a result, segment sales for the first three months ended June 30, 2012 totaled 91 million yen (82 million yen in the same period of the previous fiscal year), with a 33 million yen operating profit (a 144 million yen loss in the same period of the previous year).

(2) Qualitative information on consolidated financial position

Total assets at the end of the first three months ended June 30, 2012 increased by 235 million yen from the end of the previous fiscal year, to 158,051 million yen. The main factor behind this growth was a 2,980 million yen increase in fixed assets from growth in tangible fixed assets, which was partially offset by a 2,744 million yen decrease in current assets from a decline in cash and deposits.

Liabilities increased by 303 million yen from the previous fiscal year-end, to 100,677 million yen. Despite a 231 million yen decrease in current liabilities that included a decrease in income taxes payable, an increase in lease liabilities led to a 534 million yen increase in long-term liabilities.

Net assets decreased by 67 million yen from the previous fiscal year-end, to 57,374 million yen.

(3) Qualitative information on consolidated financial result forecasts

There is no change in the consolidated financial result forecast for the year ending March 31, 2013 which was released on May 15, 2012.

2. Summary (Notes) information

- (1) Significant changes to subsidiaries during the period There is no related information.
- (2) Application of the specific accounting for preparing the quarterly consolidated financial statements

There is no related information.

(3) Changes in accounting policies, accounting estimates and restatement

Changes in accounting policies

(Change in depreciation method for tangible fixed assets)

Previously, for depreciation of tangible fixed assets, the Nichii Group (the Company and its consolidated subsidiaries) applied the declining balance method, which has been changed to the straight line method from the first three months ended June 30, 2012.

Taking into consideration the Group's further global business development going forward, a review of the investment effect of tangible fixed assets from the perspective of integrating Group accounting policies and properly adjusting periodic income determined that the straight line method represented an allocation of expenses that conformed more closely to the actual use of these assets.

The effect of this change was to increase consolidated first-quarter operating income, ordinary income, and net income before income taxes and minority interests for the first three months ended June 30, 2012, by 90 million yen respectively.
