  - (1) Details of business results

During the first six months ended September 30, 2016, the Japanese economy remained on a modest recovery track against the background of improved employment and income conditions. However, the outlook for the economy became uncertain, chiefly reflecting the slowdown of emerging economies, increased global economic uncertainly due to the Brexit and stagnant corporate earnings.

With the advent of a super-aging society and a shrinking population, Japan has arrived at a chronic labor shortage. The administration led by Prime Minister Shinzo Abe is about to insert a scalpel into the structural problem known as productivity decline caused by the decreasing workforce through a labor-force participation ratio increase based on reforms such as the correction of different wages for identical labor and long working hours, through policies it calls the "promotion of dynamic engagement of all citizens" and "reforms of working styles."

Personnel procurement has also been an issue of utmost importance in the fields of long-term care and child care where the Nichii Gakkan Group operates. A shortage in the volume of services provided attributable to a serious shortage of competent individuals has been causing people to leave their jobs in order to take care of family members and has led to an increase in the number of children on waiting lists for admission to kindergartens. This situation has been a barrier to labor productivity enhancement across all industries.

In this business environment, the Nichii Gakkan Group undertook its operations to meet rapidly changing social requirements, achieve corporate growth and solve problems in society based on its management philosophy of "contributing to the enhancement of human life through the development of our business."

The Group aims to be a team of excellent companies whose presence is felt worldwide, adopting as its management vision the business triangle of core businesses (the Medical Support, Long-term Care and Child Care Segments) performed with sincerity and pride, strategic businesses (the Education and Health Care Segments) that support greater profit returns to all stakeholders, and globalization businesses (overseas businesses in China and other markets), undertaken with a wide range of vision, dreams and passion.

The Group is building a stable and highly profitable business base that is unaffected by system trends, and is strengthening its future-oriented business base with international contributions in mind by expanding a business lineup that covers social contribution, profit returns and future orientation without omission.

In terms of reforms in the management execution structure, the Group worked to revitalize its entire organization through the executive officer system and took exhaustive actions to speed up business execution by 28 executive officers assigned to take charge of the respective businesses and regions and to implement community-based strategies. Furthermore, the Group made efforts to bolster the business execution and strategic implementation capabilities of its respective branches, other offices and business bases.

Looking at operating results, the Medical Support and Long-term Care Segments weakened as delays occurred in the acquisition of contracts with medical institutions and long-term care service users due to a shortage of capable individuals. Nonetheless, sales grew, backed by the Child Care and China Business Segments, which remained strong. Income also improved as a result of administrative operation reviews at the head office, branches and other offices and the advancement of promotional activities focused on cost-effectiveness.

The Group will strive to build a solid personnel base and secure stable income by acquiring and retaining capable individuals who will be its service providers with the maximum use of its original personnel training scheme dubbed "from education to job placement."

In the first six months under review, the Group posted net sales of 137,751 million yen (compared with net sales of 136,575 million yen in the first half of the previous fiscal year), operating income of 815 million yen (compared with an operating loss of 473 million yen in the first half of the previous fiscal year), an ordinary loss of 1,110 million yen (compared with an ordinary loss of 1,701 million yen in the first half of the previous fiscal year) and a net loss attributable to owners of parent of 1,240 million yen (compared with a net loss attributable to owners of parent of 2,296 million yen in the first half of the previous fiscal year).

Results by business segment are as follows:

From the first quarter of this fiscal year, the China business—the results of which were originally recorded in the Medical Support Segment, Long-term Care Segment, Healthcare Segment, Child Care Segment, and Other—is presented separately as the China Business Segment.

Child care courses (babysitting courses, etc.), which previously were included in the Education System, are now included in the Child Care Segment.

To compare the results in the first half under review and the results in the first half of the previous fiscal year in the following results by business segment, the business segments for the previous fiscal year have been reclassified, as described above.

### <Medical Support Segment>

In the Medical Support Segment, the Group worked to expand businesses with a focus on the proposal-based sales of services with high added value, such as diversified management support to medical institutions that had already been under contracts, aiming to increase revenues through personnel retention. Personnel expenses grew due to reasons including the improved treatment of employees. However, the Group attempted to improve its earnings structure to secure appropriate income from new contracts and their existing counterparts. The number of students in courses for medical office work rose temporarily as a result of a special campaign. However, their number showed weakness compared with the first six months of the previous fiscal year.

As a result, the Group focused on approaching medical institutions that had already been under contracts. Both sales and income for the Segment decreased year on year, partly owing to the Group's switch to the policy of prioritizing income.

Net sales for the segment came to 54,065 million yen for the first half under review (compared with 54,395 million yen posted in the same period of the previous fiscal year). Operating income for the segment was 3,641 million yen (3,831 million yen in the same period of the previous fiscal year).

#### <Long-term Care Segment>

In the Long-term Care Segment, residential care services, including those at newly established facilities, achieved strong results. However, user acquisition for home care services produced undesirable results due to the inability to establish a system for supplying sufficient personnel able to meet growing demand. The Group worked to procure personnel by stepping up its personnel training scheme, upgraded systems for improving skills and measures for bettering treatment, and focused on promotional activities for training programs aimed at new care workers. Personnel procurement is taking some time, but sales shifted in the direction of prioritizing the service user structure focusing on users with severe conditions, signs of year-on-year sales growth began to appear, and the Segment began to shift toward a recovery track. Furthermore, income levels began recovering for both home and residential care services as a result of personnel allocation and shift management reviews.

As a result, both sales and income for the Segment rose year on year, supported by a steady increase in the number of residential care service users, even though the number of home care service users failed to grow.

Net sales for the segment came to 71,961 million yen for the first half under review (compared with 71,670 million yen in the same period of the previous fiscal year). Operating income for the segment was 4,935 million yen (3,383 million yen in the same period of the previous fiscal year).

#### <Health Care Segment>

In the Health Care Segment, the Group bolstered the lineups of Nichii Life housekeeping services and private brand products for sale to meet diverse service demands caused by lifestyle changes, and worked to expand the customer base and improve the level of customer satisfaction.

As a result, income for the Segment rose against the background of the expansion of the Nichii Life customer base and steady user growth, even though sales for the Segment decreased due to food service discontinuation and cutbacks in helper dispatch services.

Sales in this segment came to 1,790 million yen in the first half under review (compared with 1,890 million yen in the first half of the previous fiscal year), and operating income was 218 million yen (compared with 132 million yen in the first half of the previous fiscal year).

## <Education Segment>

In the Education Segment, the need for new language learning opportunities for training employees able to work outside Japan has been rising, as demonstrated by developments such as foreign language activities to be made compulsory for elementary school pupils in Grade Three and higher in fiscal 2020 and advanced language skill evaluation through university entrance examination reforms. The Group began offering online language lessons

making the most of its network in April 2016, advanced the maximization of learning outcomes through the integration of online and school lessons, and focused on acquiring more students. The Group succeeded in acquiring students efficiently and effectively through exhaustive promotional activities, including events taking advantage of its nationwide network of community-based schools, in which cost-effectiveness was emphasized.

As a result, sales for the Segment increased with steady rises in renewal ratios at schools for adults and children, and in the number of new students. Operating loss for the Segment decreased, attributable to the sales growth and improved advertising efficiency.

Net sales for the Education Segment totaled 6,347 million yen (compared with 6,346 million yen in the first half of the previous fiscal year). Operating loss for the segment was 2,405 million yen (compared with an operating loss of 2,862 million yen in the first half of the previous fiscal year).

#### <Child Care Segment>

In the Child Care Segment, the Group aggressively expanded its business bases centered on registered child care centers in a bid to reduce the number of children on the waiting lists for admission to kindergartens and promote the dynamic engagement of women. Furthermore, the Group focused on proposing the establishment of child care centers within hospitals and company offices and worked to expand the lineup of its services and the organization for supplying the services in order to meet a range of child care requirements. The Group was able to strengthen operations within the Tokyo metropolitan area where demand remains high with the acquisition in July 2016 of all shares in Sawayaka Hoiku, which provides services within the area.

As a result, sales for the Segment increased 72% year on year, contributing to revenue expansion for the Group. However, income for the Segment decreased under the adverse effects of aggressive investment in operations for establishing new child care centers.

Net sales for the Child Care Segment totaled 2,557 million yen (compared with 1,486 million yen in the first half of the previous fiscal year). The operating loss for the segment was 497 million yen (compared with a loss of 460 million yen in the first half of the previous fiscal year).

#### <China Business Segment>

The Group's organization for providing services in China expanded to 16 companies and five school corporations in 15 cities with the addition of five regional operating companies and four school corporations to the scope of consolidation in the first six months under review. These companies and corporations steadily prepared a base for training personnel in a bid to achieve the spread of independent long-term care in the respective communities. At the same time, they worked to dig up service requirements with a multi-angled approach.

The training of workers who assume the responsibility for long-term care is also an urgent issue in China. It is crucial to improve their positions as specialists.

The Group will promote personnel exchanges between Japan and China and work to achieve the spread of sound long-term care globally in order to establish the social status of long-term care workers and help them to achieve their ambitions with improved employment qualifications.

Net sales for this segment amounted to 949 million yen (compared with 712 million yen in the first half of the previous fiscal year). Operating loss for the segment was 722 million yen (compared with a loss of 410 million yen in the first half of the previous fiscal year).

### <Other Businesses>

In Other Businesses, the Group made efforts to increase synergy among businesses and companies and to improve revenues toward the goal of stepping up its management capabilities both in Japan and overseas.

Net sales for this segment stood at 78 million yen (compared with 72 million yen in the first half of the previous fiscal year). Operating income was 139 million yen (compared with 140 million yen in the first half of the previous fiscal year).

### (2) Details of financial position

Total assets at the end of the first half under review increased 4,346 million yen from the end of the previous fiscal year, rising to 188,516 million yen. The main reasons for the increase were a 5,612 million yen rise in fixed assets, mainly reflecting an increase in lease assets, and a 1,266 million yen decrease in current assets primarily due to the decline in short-term investment securities.

Liabilities increased 6,103 million yen from the end of the previous fiscal year, rising to 152,171 million yen. The key factors contributing to this increase were a 1,614 million yen rise in current liabilities, mainly reflecting an increase in short-term loans payable, and a 4,488 million yen increase in non-current liabilities, primarily attributable to an increase in lease obligations.

Net assets decreased 1,757 million yen from the end of the previous fiscal year, to 36,344 million yen.

#### (3) Information on the future outlook, including consolidated financial results forecasts

Based on progress in the first six months of the fiscal year, the Group has revised its financial results forecast for the fiscal year ending March 31, 2017, which was released on May 13, 2016, as presented below.

The Group expects sales for the Medical Support Segment and the Long-term Care Segment to fall below the previously announced figures due to delays in the acquisition of medical institutions under contract and long-term care service users caused by a shortage of capable individuals.

The Group has retained the previously announced figures as its income forecasts in view of progress in the first half according to its overall plan. The Group will continue making efforts to achieve forecast income levels, taking steps including the reviews of administrative operations at the head office, branches and other offices, and the advancement of promotional activities focusing on cost effectiveness.
